

ORAL-PRO™ Fever and Inflammation Relief...

"We recommend running ORAL-PRO Sodium Salicylate Concentrate at the first signs of flu or PRRS. Just recently on a 2,000-head site, we went in early and treated with ORAL-PRO for 4 days. The owner was so pleased with the improved appearance of the pigs, that he decided that he did not need to use antibiotics."

Comparison Chart — Sodium Salicylate 48.6% vs. Liquid Aspirin				
Product	Dose	Approximate Retail Cost/ Gallon of Stock Solution	Salicylate Dose Delivered	Cost Per Gram
ORAL-PRO 48.6%	16 oz./gallon	2.96	230.0 gram/gallon	.0128 gram
	10 oz./gallon	1.86	146.0 gram/gallon	.0127 gram
Aspirin 12%	4 oz./gallon	1.25	11.04 gram/gallon	.113 gram

"When we used regular liquid aspirin, we had a much poorer response and usually had to follow up with an antibiotic. We tell our clients the regular liquid aspirin used at the high dosage level is equivalent to them taking 1/12th of a human aspirin."
