Aurora Pharmaceutical receives FDA approval on SwineMate[®], an altrenogest oral progestin solution for mature gilts.

SwineMate[®] (altrenogest) Solution 0.22% (2.2 mg/ml) is manufactured in Northfield Minnesota in an FDA licensed facility using the same formulation as MATRIX[®].

SwineMate[®] (altrenogest) Solution is used for synchronization of estrus in sexually mature gilts that have had at least one estrus cycle. Treatment with altrenogest solution 0.22% results in estrus (standing heat) 4 to 9 days after completion of the 14-day treatment period. Administer 6.8 mL (15 mg altrenogest) per gilt once daily for 14 consecutive days. Treat gilts on an individual basis by top-dressing SwineMate[™] on a portion of each gilt's daily feed allowance. To produce the desired synchronization of estrus in a group of gilts, treat all the gilts daily for the same 14-day period.

Talk with your veterinarian about the proper use and safe-handling of SwineMate[®].

SwineMate[®] (altrenogest) Solution 0.22% is available in 1000ml plastic bottles along with a dispensing cap.

Aurora Pharmaceutical has supply agreements with all major distributors throughout the United States. Please check the website, www.aurorapharmaceutical.com, for the list and contact information.

If you would like more information, please contact Aurora customer service at 888-215-1256.
