¹ Clinical study available upon request

FOR VETERINARY USE ONLY

DIRECTIONS FOR USE

Hold sprayer about 4–6 inches from area to be treated. Spray 1 or more times - allow to dry. Repeat as needed. Forms a highly visible coating that is durable.

WARNINGS

Do not use in the eyes. Do not use if you are allergic to povidone-iodine. Prolonged exposure may cause irritation. If swallowed, get medical help or contact a Poison Control Center right away.

Store at 20°- 25° C (68°–77° F). Excursions permitted between 15°- 30° C (59°- 86° F). Avoid inhalation.

CAUTION

Flammable - use with caution. For external use only.
Keep out of reach of children. Wet hair or fur is flammable.

SWINE MARKET APPLICATION

Each year in the United States, over 100 million pigs undergo a battery of processing procedures during the first few days or weeks of their life. These include tail docking, castration, tagging and ear notching. Each of these procedures involves a degree of tissue damage resulting in the pig experiencing pain.² The pain pigs experience from these procedures may result in reduced performance. Shoulder sores in sows also continue to be a challenge for the pork producers. The industry needs a single product that is safe and effective in reducing pain and the risk of infection, resulting in a net benefit to the welfare of the animal. Aurora Pharmaceutical has developed a unique wound care product to address pain relief and prevent infections.
